

Firm Overview

Who We Are

Fortium is the #1 provider of Technology Leadership-as-a-Service® - now part of ZRG, a global executive search and talent advisory firms. We give CEOs, boards, and PE firms access to proven CIO, CTO, and CISO leadership with the credibility to lead and the continuity to last.

Services

Your company may not need a full-time Technology Leader yet - or it just lost one. Either way, it needs executive technology leadership now. Fortium closes both gaps:

- **The Credibility Gap** - decisions have become executive-level, but no executive technology leader is in place. We activate a CIO, CTO, or CISO with the presence to lead at the C-Suite.
- **The Continuity Gap** - a leader departs or transitions. We maintain the function, not just fill the seat - backed by a national bench, so momentum never resets.

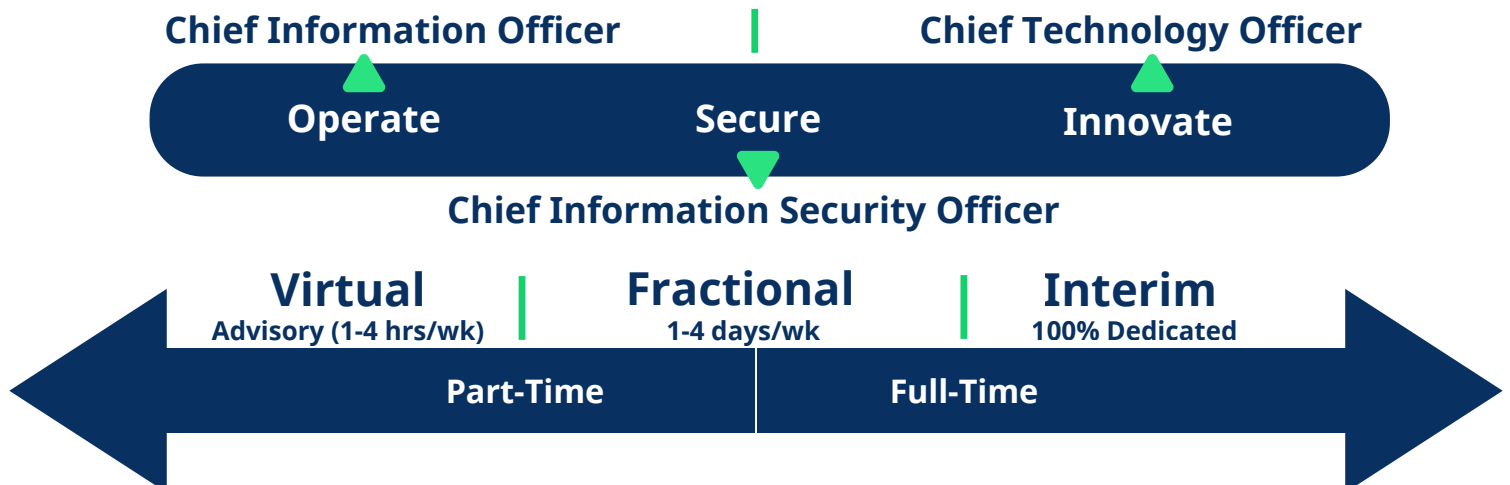

Partner Expertise

Each of the **180+** Fortium Partners:

- Offers **20+ years of experience** as a CIO, CTO, or CISO in multiple industries
- Brings the **industry expertise and gravitas** to lead at the C-Suite - not just technical capability.
- Accesses **best practices and a deep bench** so the right leader can be matched, supplemented, or transitioned in without restarting a search.

Working across many industries, from startups to Fortune 1000 companies, all of our technology leaders use decades of experience to transform our technology insights into business impact and enable technology success to foster business growth.

Leaders start in days, not months. And as part of ZRG, Fortium complements executive search - bridging the interim gap while a permanent search runs.

A Sampling of Client Success

Interim CIO

A PE firm purchased a carve-out from a prior entity with an aggressive transition timeline. Fortium provided an experienced technology leader to exceed the transition timeline objectives and increase overall business value.

Interim CTO

A NASDAQ-listed e-commerce retailer was experiencing site performance issues, causing a revenue shortfall before the start of the critical holiday season. Their private equity board recommended an Interim CTO to successfully lead them through the holiday season and begin a longer-term technology strategy review before transitioning to ongoing technology leadership.

Fractional CISO

The leading provider of student scholarship solutions needed cybersecurity leadership to oversee all business risk areas while preparing for and preventing security incidents. Since full-time CISOs are costly and hard to find, a fractional CISO role empowered the firm with part-time, long-term, affordable, world-class cybersecurity leadership to achieve readiness similar to firms 5x their size, at one-fifth the cost.

“

Fortium's Partner was integrated into our executive leadership team and played an integral role as our interim CIO during a period of tremendous growth. The consummate professional brought a high level of strategic direction and insight to critical matters of our IT architecture, infrastructure, and design.

“I would be happy to serve as a reference for any future projects for Fortium Partners.”

~President, Leading Provider of Industrial & Hydrogen Systems

Our partners have delivered **bold leadership** to the C-suites of the most respected and recognized companies in the world.
