

Technology Leadership-as-a-Service® : The CISO Role

Fortium offers a valuable alternative to the conventional hiring process with Technology Leadership-as-a-Service (TLaaS™).

Leverage the expertise of proven CIOs, CTOs, and CISOs who are ready to deliver from day one and eliminate the uncertainties and long-term commitments associated with permanent hires.

TLaaS Benefits

-  Be Flexible/Scalable
-  Reduce Costs
-  Customize Solutions
-  Access Immediate Expertise
-  Reduce Risks

The Chief Information Security Officer (CISO) Role

Our CISOs have 20+ years of experience in a technology leadership role at some of the most respected and well-known companies. We can help you right-size a strategy for your industry's risk profile:

 Assess your current cybersecurity readiness

 Advise leadership on Cyber Insurance

 Build a cybersecurity program based on NIST, ISO, & SOC 2 standards

 Develop/Execute a cybersecurity incident response plan/protocol

Why choose a Fortium CISO?

Client Outcomes

- Access to Technology Resources
- Improved Business Continuity
- Results in Days (not weeks)
- Increased Compliance
- Improved Cybersecurity Posture
